I am a truckdriver and I have XM radio. It helps me a lot by XM airing the weather and traffic. When we (the truck drivers) are out west, we have no signal and can't pull in the regular radio, but we don't have that problem with XM. If it wasn't for XM airing the weather and traffic, we wouldn't know if there were traffic or weather problems. XM keeps us updated constantly, the regular radio stations, when you can get them, doesn't do a real good job reporting. We need XM weather/traffic because our trucks are a lot bigger than the cars and we just can't stop on a dime. So please do not stop XM from airing the weather and traffic because it might hurt someone's billfold, let XM air it for the right reason, getting information out to the drivers all over the country, not just certain areas.
